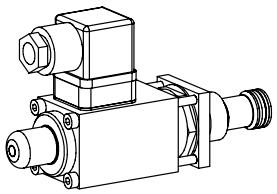
Proportional inverse pressure relief valve
Screw-in cartridge
- **Direct operated**
- **Q_{max} = 20 l/min**
- **p_{max} = 400 bar**
- **$p_{N\ max}$ = 315 bar**

M22x1,5
ISO 7789



DESCRIPTION

Direct operated proportional pressure relief valve with inverse function. Thread M22x1,5 for cavity according to ISO 7789. As standard versions, 7 pressure ranges are available: 20, 40, 63, 100, 160, 200, 315 bar. Good flow performance due to the differential area principle. Small leak along the poppet guide. Adjustmend by a Wandfluh proportional solenoid. The cartridge and the solenoid made of steel are zinc coated and therefore rust-protected. Wandfluh proportional amplifiers are needed to control the proportional pressure relief valve (register 1.13).

FUNCTION

The valve limits the pressure in the port P (1) and reliefs the volume flow to tank port T (2). The back pressure in T (2) influences the pressure in P (1). A spring, which is adjustable from the outside within a limited range, presses the poppet against the seat and hereby adjusts the maximum operating pressure. The force of the proportional solenoid counteracts the spring force. For this reason, the operating pressure declines with the increasing solenoid current (inverse function). When the solenoid is currentless, the maximum operating pressure is present. The pressure on the guided poppet acts on a differential area between the seat diameter and poppet guide diameter. The good flow characteristics are achieved through large seat diameters.

APPLICATION

The valve has its application in hydraulic systems, in which the pressure frequently has to be changed. The facility for remote control and signal processing from process control systems enable elegant, comfortable solutions to problems. By means of the inverse function, the maximum system pressure is maintained if the electric valve control fails (safety function). In such cases, e.g., the descending of a load is prevented, or cooling ventilators with hydraulic motor drives are kept in operation. Installation of the screw-in cartridge in control blocks as well as in the Wanfluh sandwich plates (vertical stacked systems) and flange valves of the NG4-Mini and NG6 types. (Please note the separate data sheets in register 2.3).

TYPE CODE

B D I PM22 - [ ] - [ ] # [ ]

- Pressure relief valve
- Direct operated
- Proportional inverse
- Screw-in cartridge M22x1,5
- Standard nominal pressure ranges:

p_N = 20 bar	20	p_N = 160 bar	160
p_N = 40 bar	40	p_N = 200 bar	200
p_N = 63 bar	63	p_N = 315 bar	315
p_N = 100 bar	100		

- Standard nominal voltage:

U_N = 12 VDC	G12
U_N = 24 VDC	G24

- Design-Index (Subject to change)

• Data sheet is valid from design-index #2 on

GENERAL SPECIFICATIONS

Description	Direct operated proportional pressure relief valve with inverse function
Construction	Screw-in cartridge for cavity to ISO 7789
Operations	Proportional solenoid with spring
Mounting	Screw-in thread M22x1,5
Ambient temperature	-20…+50 °C
Mounting position	any
Fastening torque	M_D = 50 Nm for screw-in cartridge M_D = 2,6 Nm (qual. 8.8) for solenoid screws
Weight	m = 0,6 kg

HYDRAULIC SPECIFICATIONS

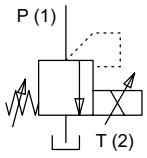
Fluid	Mineral oil, other fluid on request
Contamination	ISO 4406:1999, class 18/16/13
efficiency	(Required filtration grade ß 6...10 ≥ 75) see data sheet 1.0-50/2
Viscosity range	12 mm²/s…320 mm²/s
Fluid temperature	-20…+70 °C
Peak pressure	p_{max} = 400 bar
Nominal pres. ranges	see type code
Min. volume flow	Q_{min} = 0,2 l/min
Max. volume flow	Q_{max} = 20 l/min for p_N = 20/40/100/160/200 bar Q_{max} = 15 l/min for p_N = 63/315 bar
Leakage volume flow	see characteristics
Repeatability	≤ 2 % *
Hysteresis	≤ 4 % *
	* at optimal dither signal

ELECTRICAL SPECIFICATIONS

Construction	Proportional solenoid, wet pin push type, pressure tight	
Standard-nominal voltage	U_N = 12 VDC	U_N = 24 VDC
Limiting current	I_G = 1250 mA	I_G = 680 mA
Relative duty factor	100% DF (see data sheet 1.1-430)	
Protection class	IP 65 acc. to EN 60 529	
Connection/Power supply	Over device plug connection to ISO 4400 / DIN 43 650 (2P+E)	

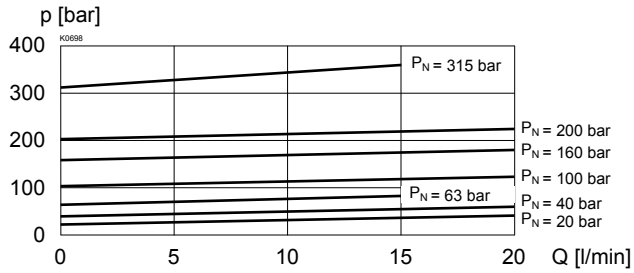
Other electrical specifications see data sheet 1.1-117

SYMBOL

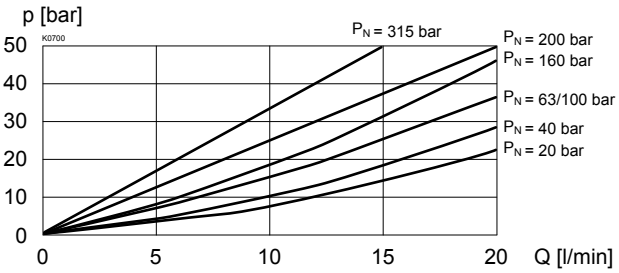


CHARACTERISTICS oil viscosity υ = 30 mm²/s

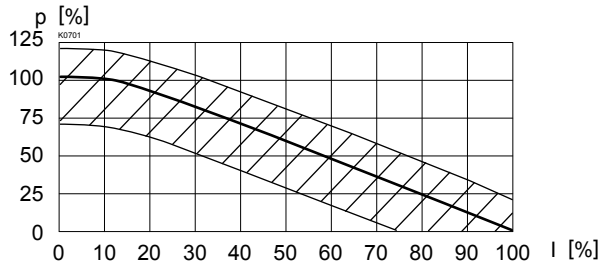
p = f (Q) Pressure volume flow characteristics
(Maximum adjustable pressure)



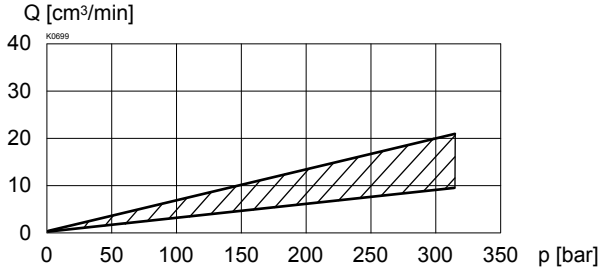
p = f (Q) Pressure volume flow characteristics
(Minimum adjustable pressure)



p = f (I) Pressure adjustment characteristics
(Q = 1 l/min)



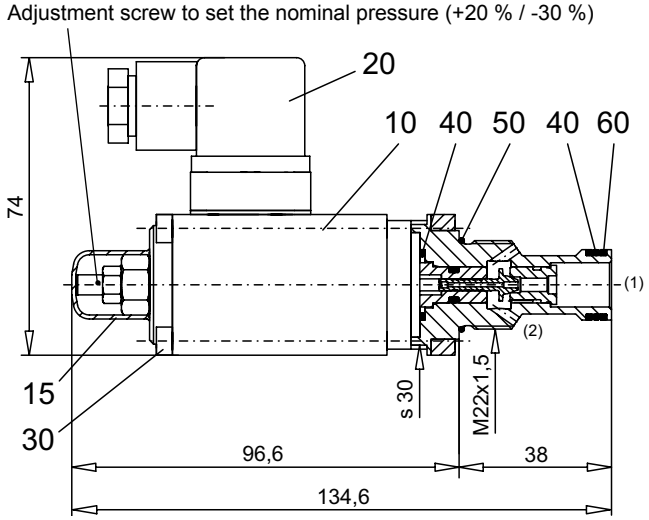
Q_L = f (p) Leakage volume flow characteristics



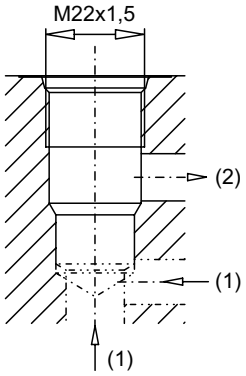
Adjustable range of nomial pressure, adjusted with set screw under the clamp cap.

DIMENSIONS / SECTIONAL DRAWINGS

Adjustment screw to set the nominal pressure (+20 % / -30 %)



Cavity drawing according to
ISO 7789–22–02–0–98



For detailed cavity drawing and cavity tools see data sheet 2.13-1003
